Experimental Project

Component
École Nationale Supérieure d'Électrotechnique d'Électronique

In brief

Code ELP: N8EM01A

Presentation

Objectives

Give the students the opportunity to deepen their knowledge by carrying out a project in a small group under the guidance of an educational tutor. Allow students to acquire autonomy and sense of initiative. Introduce students to project management and teamwork.

Description

The work program depends on the subject chosen in consultation between the group of students and the tutor. It focuses on the illustration, mostly experimental, and the better understanding of physical phenomena addressed in the teachings of the department.

Non-contractual information.
